August 26, 2026

CURRICULUM VITAE

I. COMPLETE NAME

Masaki Mizuno, Ph.D.
Department of Applied Clinical Research
University of Texas Southwestern Medical Center
5323 Harry Hines Boulevard, Dallas, Texas 75390-9174, USA
Tel: +1-214-648-9188
Fax: +1-214-648-3566
Email: masaki.mizuno@utsouthwestern.edu

II. EDUCATION

UT Southwestern Medical Center, Dallas, TX	Postdoctoral Fellow	05/2011
Waseda University, Tokyo, Japan	PhD	03/2005
Waseda University, Tokyo, Japan	MS	03/2002
Waseda University, Tokyo, Japan	BS	03/2000

III. PROFESSIONAL EXPERIENCE

1. Academic:

04/2026-	Research Collaborator National Institute of Fitness and Sports in KANOYA, Japan
09/2025-	Professor Department of Applied Clinical Research, University of Texas Southwestern Medical Center at Dallas
09/2020-08/2025	Associate Professor Department of Applied Clinical Research, University of Texas Southwestern Medical Center at Dallas
11/2019-08/2020	Assistant Professor Department of Applied Clinical Research, University of Texas Southwestern Medical Center at Dallas
04/2014-10/2019	Assistant Professor Department of Health Care Sciences, University of Texas Southwestern Medical Center at Dallas
06/2011-03/2013	Instructor Department of Health Care Sciences, University of Texas Southwestern Medical Center at Dallas
05/2009-05/2011	Postdoctoral Research Fellow Department of Physical Therapy, University of Texas Southwestern Medical Center at Dallas
04/2009-10/2011	Postdoctoral Research Fellow

	Japan Society for the Promotion of Science (JSPS), Research Fellowships for Young Scientists
09/2008-03/2009	Part-time Instructor (Sports Nutrition) School of Law, Setsunan University
09/2007-03/2009	Part-time Instructor (Health Science, Sports Sciences) Faculty of Service Industries, University of Marketing and Distribution Sciences
04/2006-03/2009	Research Fellow Department of Cardiovascular Dynamics, National Cardiovascular Center Research Institute
04/2005-03/2006	Research Associate Faculty of Sport Sciences, Waseda University
04/2005-03/2006	Visiting Researcher Positron Medical Center, Tokyo Metropolitan Institute of Gerontology

2. Administrative: Title, Institution, Inclusive Dates
N/A
3. Hospital/Agency: Title, Institution, Inclusive Dates
N/A
4. Other: Place, Inclusive Dates
N/A

IV. CERTIFICATION OR BOARD STATUS

N/A

V. LICENSES

N/A

VI. RESEARCH AND SCHOLARSHIP

1. Research Grants and Contracts

Pending

Title: Role of amyloid β in abnormal blood pressure regulation in diabetes
Purpose: These studies are designed to determine whether amyloid β contributes to the blunted cardiovascular and sympathetic responses during exercise in diabetes.
Funding Agency: NIH 1R01HL191758-01
Funding Date: 04/01/2027-03/31/2032
Requested funding: $4,038,895
Principal Investigator: M. Mizuno, 20% effort

Title: Impact of Menopause on Mechanosensory Control of Autonomic Cardiovascular Regulation
Purpose: These studies are designed to determine the impact of menopause on peripheral and central mechanosensory control of autonomic cardiovascular regulation.
Funding Agency: SHP Interdisciplinary Research Grant Program-UTSW
Funding Dates: 09/01/2026-08/31/2027
Amount Award: $20,000
Principal Investigator: M. Mizuno, 20% effort

Title: Role of amyloid β in abnormal blood pressure regulation in diabetes
Purpose: These studies are designed to determine whether amyloid β contributes to the blunted cardiovascular and sympathetic responses during exercise in diabetes.
Funding Agency: NIH 1R01HL180593-01A1
Funding Dates: 04/01/2026-03/31/2031
Requested funding: $3,941,895
Principal Investigator: M. Mizuno, 20% effort

Present

Title: Targeting Metabolic Acidosis for Treating Hypertension and Sympathetic Overactivation in Chronic Kidney Disease
Purpose: These studies are designed to determine whether metabolic acidosis contributes to chronic kidney disease-induced sympathetic overactivation and hypertensive responses during exercise.
Funding Agency: Career Development Award-American Heart Association
Funding Dates: 04/01/2024-03/31/2027
Amount Award: $231,000
Principal Investigator: H.K. Kim
Role: Co-Investigator, 3% effort

Title: Mechanobiological mechanisms in the exercise pressor reflex
Purpose: These studies are designed to determine candidate molecules for the mechano-sensitive channels involved in exercise pressor reflex.
Funding Agency: Fund for the Promotion of Joint International Research (Fostering Joint International Research (B), Grant-in-Aid for Scientific Research – JSPS
Funding Dates: 10/01/2022-03/31/2027
Amount Awarded: $ 140,000
Principal Investigator: N. Hotta
Role: Collaborator

Completed

Title: Abnormal Blood Pressure Regulation in Aging: Role of Amyloid Beta and its Treatment with Insulin
Purpose: These studies are designed to determine the effect of amyloid-β accumulation to the development of blood pressure variability in aging.

Funding Agency: Overseas Research Fellowship, JSPS
Funding Dates: 04/01/2026-03/31/2028
Amount Award: $82,000
Principal Investigator: A. Fukazawa
Role: Mentor

Title: Impact of glucocorticoid-induced mechanobiological alterations in cardiovascular control under chronic stress
Purpose: These studies are designed to determine the effect of chronic stress on cardiovascular regulation.
Funding Agency: Overseas Research Fellowship, JSPS
Funding Dates: 04/01/2024-03/31/2026
Amount Award: $82,000
Principal Investigator: A. Hori
Role: Mentor

Title: Impacts of excessive dietary linoleic acid on muscle afferents and the exercise pressor reflex
Purpose: These studies are designed to determine the contributions of linoleic acid to the development of exercise pressor reflex dysfunction.
Funding Agency: SHP Interdisciplinary Research Grant Program-UTSW
Funding Dates: 09/01/2023-08/31/2025
Amount Award: $20,000
Principal Investigator: J. A. Estrada
Role: Co-Investigator

Title: Preventing Hypertension and Sympathetic Overactivation by Targeting Metabolic Acidosis in CKD
Purpose: These studies are designed to determine whether metabolic acidosis contributes to chronic kidney disease-induced sympathetic overactivation and hypertensive responses during exercise.
Funding Agency: Pilot Award, Center for Mineral Metabolism and Clinical Research, UTSW
Funding Dates: 07/01/2024-06/30/2025
Amount Award: $50,000
Principal Investigator: W. Vongpatanasin and M. Mizuno
Role: Co-Principal Investigator, 5% effort

Title: Impact of amyloid-β accumulation before diagnosis of Alzheimer’s disease on blood pressure variability
Purpose: These studies are designed to determine the effect of amyloid-β accumulation to the development of blood pressure variability in Alzheimer’s disease.
Funding Agency: Postdoctoral Fellowships, JSPS
Funding Dates: 04/01/2023-03/31/2025
Amount Award: $130,000
Principal Investigator: A. Fukazawa
Role: Mentor

Title: Targeting Insulin Resistance to Improve Abnormal Cardiovascular Control in Diabetes
Purpose: These studies are designed to determine the contributions of hyperinsulinemia to the development of exercise pressor reflex dysfunction in diabetes.
Funding Agency: NIH NHLBI (R01HL151632)
Funding Dates: 06/01/2020-5/31/2025 (NCE)
Amount requested: $ 1,971,528
Principal Investigator: M. Mizuno, 30% effort

Title: Impact of glucocorticoid-induced mechanobiological alterations in cardiovascular control under chronic stress
Purpose: These studies are designed to determine the effect of chronic stress on cardiovascular regulation.
Funding Agency: Postdoctoral Fellowships, JSPS
Funding Dates: 04/01/2023-03/31/2024
Amount Award: $40,000
Principal Investigator: A. Hori
Role: Mentor

Title: Impact of amyloid-β accumulation before diagnosis of Alzheimer's disease on blood pressure variability
Purpose: These studies are designed to determine the effect of amyloid-β accumulation on the development of blood pressure variability in Alzheimer's disease.
Funding Agency: Pilot Synergy Grants for Collaborative Research- UTSW
Funding Dates: 03/01/2022-02/28/2023
Amount Award: $ 100,000
Principal Investigator: M. Mizuno, 5% effort

Title: Amyloid-β and abnormal blood pressure control
Purpose: These studies are designed to determine the effect of amyloid-β accumulation on the development of blood pressure variability in Alzheimer's disease.
Funding Agency: Overseas Postdoctoral Fellowships, The Uehara Memorial Foundation
Funding Dates: 04/01/2022-03/31/2023
Amount Award: $30,000
Principal Investigator: A. Fukazawa
Role: Mentor

Title: Control of blood pressure by gut-derived toxins in muscle sensory neuron
Purpose: These studies are designed to determine the contributions of gut gram-negative bacteria such as lipopolysaccharides to the development of exercise pressor reflex dysfunction in obesity.
Funding Agency: SHP Interdisciplinary Research Grant Program-UTSW
Funding Dates: 09/01/2021-08/31/2022
Amount Award: $13,000
Principal Investigator: R. Ishizawa
Role: Co-Investigator

Title: Preventing Hypertension and Sympathetic Overactivation by Targeting Phosphate
Purpose: These studies are designed to determine the contributions of phosphate in the development of hypertension and sympathetic overactivation.
Funding Agency: NIH R01 HL113738
Funding Dates: 04/01/2017-03/31/2022 (No cost extension)
Amount Awarded: $3,169,816
Principal Investigator: W. Vongpatanasin
Role: Collaborator, 10% effort

Title: The impact of exercise intensity on brain derived neurotrophic factor in Parkinson's disease: A Pilot study, from the bench to the clinic
Purpose: These studies are designed to determine the impact of exercise intensity on BDNF and functional outcomes in a parallel model of PD in rats and humans.
Funding Agency: Interdisciplinary Research Grant Program, UTSW
Funding Dates: 09/01/2019-08/31/2020
Amount Awarded: $10,000
Principal Investigator: S. Shearin
Role: Co-Principal Investigator

Title: Neuroprotective and metabolic effects of geranylgeraniol and δ–tocotrienol in streptozotocin-induced Alzheimer's rat models
Purpose: These studies are designed to elucidate potential impact of geranylgeraniol and δ-tocotrienol on Aβ- and metabolic-related disturbances in the Alzheimer's disease animal model.
Funding Agency: Interdisciplinary Research Grant Program, UTSW
Funding Dates: 09/01/2019-08/31/2020
Amount Awarded: $10,000
Principal Investigator: H. Yeganehjoo
Role: Co-Principal Investigator

Title: The Role of Insulin in Augmenting Exercise Pressor Reflex Function in Diabetes
Purpose: These studies are designed to determine the contributions of hyperinsulinemia to the development of exercise pressor reflex dysfunction in diabetes.
Funding Agency: Grant-in-Aid for Scientific Research - JSPS
Funding Dates: 04/01/2017-03/31/2020
Amount Awarded: $46,800
Principal Investigator: N. Hotta
Role: Collaborator

Title: Targeting Insulin Resistance to Improve Abnormal Cardiovascular Control in Diabetes
Purpose: These studies are designed to determine the mechanisms responsible for the development of abnormal exercise pressor reflex function in type 2 diabetes.
Funding Agency: Interdisciplinary Research Grant Program, UTSW
Funding Dates: 09/01/2018-08/31/2019
Amount Awarded: $14,000
Principal Investigator: M. Mizuno

Title: Hyperinsulinemia Augments Exercise Pressor Reflex Function in Diabetes
Purpose: These studies are designed to determine the contributions of hyperinsulinemia to the development of exercise pressor reflex dysfunction in diabetes.
Funding Agency: Grants for scientific research-The Nakatomi Foundation
Funding Dates: 04/01/2018-03/31/2019
Amount Awarded: $10,000
Principal Investigator: N. Hotta
Role: Collaborator

Title: Impact of geranylgeraniol and d-8-tocotrienol on the cognitive function and hippocampal protein biomarkers in streptozotocin-induced Alzheimer's rat models.
Purpose: These studies are designed to determine effect of geranylgeraniol and d-8-tocotrienol diet on the cognitive function in Alzheimer's disease.
Funding Agency: SHP Interdisciplinary Research Grant Program-UTSW
Funding Dates: 09/01/2017-08/31/2018
Amount Awarded: $14,000
Principal Investigator: H. Yeganehjoo
Role: Co-Principal Investigator

Title: The Role of Aldosterone in Augmenting Exercise Pressor Reflex Function in Hypertension
Purpose: These studies are designed to determine the contributions of hyperaldosteronism to the development of exercise pressor reflex dysfunction in hypertension.
Funding Agency: NIH R01 HL113738
Funding Dates: 02/01/2013-01/31/2017
Amount Awarded: $2,754,975
Principal Investigator: W. Vongpatanasin
Role: Collaborator, 10% effort

Title: The Role of Klotho in Sympathetic Regulation in Hypertension
Purpose: These studies are designed to determine the role of Klotho in the development of abnormal autonomic function during physical exercise in hypertensive rats.
Funding Agency: O'Brien Kidney Research Center P&F Grant-UTSW
Funding Dates: 06/01/2015-05/31/2016
Amount Awarded: $35,000
Principal Investigator: M. Mizuno, 30% effort

Exaggerated pressor and sympathetic nerve responses during spontaneously-occurring motor activity in decerebrate spontaneously hypertensive rats. *Experimental Biology 2021*, Virtual, USA, April, 2021. *FASEB Journal Vol. 35, S1, 2021.*

30) Rie Ishizawa, Norio Hotta, Han-Kyul Kim, Gary A. Iwamoto, Jere H. Mitchell, Scott A. Smith, Wanpen Vongpatanasin, **Masaki Mizuno**. Role of Piezo channels in group IV muscle afferent fiber mechanosensation in rats. *Experimental Biology 2021*, Virtual, USA, April, 2021. *FASEB Journal Vol. 35, S1, 2021.*

31) Rie Ishizawa, Han-Kyul Kim, Norio Hotta, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. Sensory Neuron Sensitization By Pkc-induced Trpv1 Phosphorylation in Type 2 Diabetic Rats. *67th Annual Congress of the American College of Sports Medicine*, San Francisco, USA, May-June, 2020. *Medicine and Science in Sports Exercise. Vol. 52, 7S: 227, 2020.*

32) Han-Kyul Kim, Rie Ishizawa, Norio Hotta, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. Skeletal Muscle Reflex-Induced

Dysregulation of Sympathetic Nerve Activity in Type 1 Diabetic Rats. *Experimental Biology 2020,* San Diego, USA, April, 2020. *FASEB Journal Vol. 34, S1, 2020.*

33) Rie Ishizawa, Han-Kyul Kim, Norio Hotta, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. Sensitization of group lV skeletal muscle afferents in type 1 diabetic rats. *Experimental Biology 2020,* San Diego, USA, April, 2020. *FASEB Journal Vol. 34, S1, 2020.*
34) Norio Hotta, Amane Hori, Yukiko Okamura, Reizo Baba, Hidehiro Watanabe, Jun Sugawara, Han-Kyul Kim, Rie Ishizawa, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. Insulin resistance is an independent factor to determine an exaggerated pressor response to ischemic rhythmic handgrip in non–diabetic older adults. *Experimental Biology 2020,* San Diego, USA, April, 2020. *FASEB Journal Vol. 34, S1, 2020.*
35) Rie Ishizawa, Han-Kyul Kim, Norio Hotta, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. An exaggerated muscle metaboreflex in diabetic rats is mediated by potentiated skeletal muscle afferent responsiveness. *66th Annual Congress of the American College of Sports Medicine,* Orlando USA, May-June, 2019. *Medicine and Science in Sports Exercise. Vol. 51, No. 6: 494, 2019.*
36) Norio Hotta, Kimiaki Katanosaka, Kazue Mizumura, Rie Ishizawa, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. Responses to Mechanical and Chemical Stimuli are Augmented by Insulin Administration in Neurons Innervating Skeletal Muscle. *Experimental Biology 2019,* Orlando, USA, April, 2019. *FASEB Journal Vol. 33, No. 1, 540.1, 2019.*
37) Rie Ishizawa, Han-Kyul Kim, Norio Hotta, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith, and **Masaki Mizuno**. An Exaggerated Muscle Mechanoreflex in Type 2 Diabetic Rats Is Mediated by Potentiated Skeletal Muscle Afferent Discharge to Mechanical Stimulation. *Experimental Biology 2019,* Orlando, USA, April, 2019. Featured Topic - Regulation of Muscle Sympathetic Outflow during Exercise. *FASEB Journal Vol. 33, No. 1, 860.1, 2019.*
38) Rie Ishizawa, Norio Hotta, Gary A. Iwamoto, Han-Kyul Kim, Wanpen Vongpatanasin, Jere H. Mitchell, Scott A. Smith and **Masaki Mizuno**. Enhanced muscle afferent responses to mechanical/chemical stimuli in type 2 diabetic rats in vitro. *9th FAOPS*, Kobe, JAPAN March, 2019. *Journal of Physiological Sciences* Volume 69, Supplement 1, pp 1–314, 2019.
39) Norio Hotta, Kimiaki Katanosaka, Kazue Mizumura, Jere H. Mitchell, Scott A. Smith and **Masaki Mizuno**. Insulin Potentiates Neuronal Responses to Chemical Stimulation in Thin Muscle Afferents and Dorsal Root Ganglia. 65th Annual Congress of the American College of Sports Medicine, Minneapolis USA, May-June, 2018. *Medicine and Science in Sports Exercise. Vol. 50, No. 5: 536, 2018.*
40) Norio Hotta, Kimiaki Katanosaka, Kazue Mizumura, Jere H. Mitchell, Scott A. Smith and **Masaki Mizuno**. Neural Responses to Mechanical Stimulation in Thin Muscle Afferents and Dorsal Root Ganglia are Sensitized by Insulin. Experimental Biology 2018, San Diego,

USA, April, 2018. Featured Topic - Battle of the Reflexes: Chemo- versus Baroreflexes during Physiological Stressors, Aging and Cardiovascular Disease. *FASEB Journal Vol. 32, No. 1, 884.1, 2018.*

41) Masaki Mizuno, Jere H. Mitchell, and Scott A. Smith. Exaggerated Cardiovascular Response to Muscle Mechanoreflex Activation in Type 2 Diabetic Rats. 64th Annual Congress of the American College of Sports Medicine, Denver, USA, May-June, 2017. *Medicine and Science in Sports Exercise. Vol. 49, No. 5: 66-67, 2017.*
42) **Masaki Mizuno**, Jere H. Mitchell, and Scott A. Smith. Exaggerated sympathetic and pressor responses to exercise pressor reflex activation are attenuated by intracerebroventricular insulin administration in type 2 diabetic rats. Experimental Biology 2017, Chicago, USA, April, 2017. *FASEB Journal Vol. 31, No. 1, 712.3, 2017.*
43) **Masaki Mizuno**, Scott Crawford, Samuel Rosengarden, Jere H. Mitchell, Scott A. Smith and Wanpen Vongpatanasin. Excess phosphorus intake potentiates the skeletal muscle mechanoreflex and metaboreflex in rats. 63th Annual Congress of the American College of Sports Medicine, Boston, USA, May-June, 2016. *Medicine and Science in Sports Exercise. Vol. 48, No. 5: 201, 2016.*
44) **Masaki Mizuno**, Seth H. Holwerda, Jere H. Mitchell, Scott A. Smith and Paul J. Fadel. Enhanced skeletal muscle metaboreflex activation in type 2 diabetes. Experimental Biology 2016, San Diego, USA, April, 2016. *The FASEB Journal Vol. 30, No. 1, 1004.3, 2016.*
45) **Masaki Mizuno**, Scott Crawford, Cooper Carnahan, Jere H. Mitchell, Scott A. Smith, Wanpen Vongpatanasin. High inorganic phosphate diet augments the sympathetic response to exercise pressor reflex activation in rats. Experimental Biology 2016, San Diego, USA, April, 2016. *The FASEB Journal Vol. 30, No. 1, 1006.1, 2016.*
46) **Masaki Mizuno**, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, and Scott A. Smith. Exercise training ameliorates sympathetic overactivity in response to muscle metaboreflex stimulation in spontaneously hypertensive rats. 62th Annual Congress of the American College of Sports Medicine, San Diego, USA, May, 2015. *Medicine and Science in Sports Exercise. Vol. 47, No. 5: 739-740, 2015.*
47) **Masaki Mizuno**, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, and Scott A. Smith. Voluntary exercise training attenuates the enhanced sympathetic responses to muscle mechanoreflex activation in spontaneously hypertensive rats. Experimental Biology 2015, Boston, USA, March, 2015. *The FASEB Journal Vol. 29, No. 1, 1055.8, 2015.*
48) **Masaki Mizuno**, Gary A. Iwamoto, Wanpen Vongpatanasin, Jere H. Mitchell, and Scott A. Smith. Impaired functional sympatholysis in spontaneously hypertensive rats is normalized by exercise training via a nitric oxide mechanism. 61th Annual Congress of the American College of Sports Medicine, Orland, USA, May, 2014. *Medicine and Science in Sports Exercise. Vol. 46, No. 5: 321-336, 2014.*
49) **Masaki Mizuno**, Ryan M. Downey, Jere H. Mitchell, Scott A. Smith, and Wanpen Vongpatanasin. High salt intake and aldosterone independently augment the exercise

pressor reflex in rats. Experimental Biology 2014, San Diego, USA, April, 2014. *The FASEB Journal Vol. 28, No. 1, 1165.10, 2014.*

50) **Masaki Mizuno**, Ryan Downey, Jere H. Mitchell, and Scott A. Smith. Alterations in the Cardiovascular Response to Central Command and Exercise Pressor Reflex Activation in Type 2 Diabetic Rats. 60th Annual Congress of the American College of Sports Medicine, Indianapolis, USA, May, 2013. *Medicine and Science in Sports Exercise. Vol. 45, No. 5: 188-190, 2013.*
51) **Masaki Mizuno**, German Lozano, Khurrum Siddique, Michel Baum, and Scott A. Smith. Enalapril attenuates the exaggerated sympathetic response to physical stress in prenatally programmed hypertensive rats. Experimental Biology 2013, Boston, USA, April, 2013. *The FASEB Journal Vol. 27, No. 1, 943.10, 2013.*
52) **Masaki Mizuno**, Khurrum Siddique, Michel Baum, Scott A. Smith. Prenatal Programming of Hypertension by Dietary Protein Deprivation Alters Skeletal Muscle Reflex Function in Rats. 59th Annual Congress of the American College of Sports Medicine, San Francisco, USA, June, 2012. *Medicine and Science in Sports Exercise. Vol. 44, No. 5: 267-958, 2012.*
53) **Masaki Mizuno**, Ryan Downey, Jere H. Mitchell, and Scott A. Smith. Brain insulin modulates the cardiovascular response to central command and exercise pressor reflex stimulation in rats. Experimental Biology 2012, San Diego, USA, April, 2012. *The FASEB Journal Vol. 26 No. 1, 1091.12, 2012.*
54) **Masaki Mizuno**, Megan N. Murphy, Jere H. Mitchell, and Scott A. Smith. Exaggerated Sympathetic Responses to Metaboreflex Activation during Ischemic Muscle Contraction in Hypertensive Rats. 58th Annual Congress of the American College of Sports Medicine, Denver, USA, June, 2011. *Medicine and Science in Sports Exercise. Vol. 43, No. 5: 459, 2011.*
55) **Masaki Mizuno**, Megan N. Murphy, Jere H. Mitchell, and Scott A. Smith. Skeletal muscle metaboreflex overactivity is mediated by the TRPv1 receptor in spontaneously hypertensive rats. Experimental Biology 2011, Washington, USA, April, 2011. *The FASEB Journal Vol. 25, No. 1, 640.1, 2011.*
56) **Masaki Mizuno**, Megan N. Murphy, Jere H. Mitchell, and Scott A. Smith. Sympathetic Nerve Responses to Activation of Chemically-Sensitive Skeletal Muscle Afferent Fibers in Hypertensive Rats. 57th Annual Congress of the American College of Sports Medicine, Baltimore, USA, June, 2010. *Medicine and Science in Sports Exercise. Vol. 42, No. 5: 328, 2010.*
57) **Masaki Mizuno**, Megan N. Murphy, Jere H. Mitchell, and Scott A. Smith. The sympathetic response to activation of the skeletal muscle mechanoreflex is enhanced in spontaneously hypertensive rats. Experimental Biology 2010, Anaheim, USA, April, 2010. *The FASEB Journal Vol. 24, No. 1, 619.5, 2010.*
58) **Masaki Mizuno**, Atsunori Kamiya, Toru Kawada, Masaru Sugimachi. Muscarinic potassium channels play a significant role in the negative chronotropic response with or

without background sympathetic tone. Experimental Biology 2008, San Diego, USA, April, 2008. *The FASEB Journal Vol. 22, No. 1, 970.2, 2008.*

59) **Masaki Mizuno**, Yuichi Kimura, Kenji Ishii, Keiichi Oda, Toru Sasaki, Kazunori Kawamura, Kiichi Ishiwata, Isao Muraoka. Effects of endurance training on adenosine A2A receptor density in myocardium and skeletal muscle. 51st Annual Congress of the American College of Sports Medicine, Indianapolis, USA, June, 2004. *Medicine and Science in Sports Exercise. Vol. 36, No. 5: S26, 2004.*

c. Editorials, position papers, background papers

N/A

d. Original invited lectures and presentations published for distribution

1) **Masaki Mizuno**. Tuning the autonomic symphony: central insulin signaling and autonomic control at rest and during exercise. 36th International Symposium on the Autonomic Nervous System, Clearwater Beach, FL, November 2025.
2) **Masaki Mizuno.** Amyloid beta and autonomic dysfunction., 257th Sports Sciences Meeting, Waseda University, Tokorozawa, Japan, October 2025.
3) **Masaki Mizuno** and Ayumi Fukazawa. Amyloid beta and alterations in mechanical sensation., Symposium (organizer and speaker), 78th Annual meeting of Japan Society of Neurovegetative Research, Nagoya, Japan, October 2025.
4) **Masaki Mizuno.** Amyloid beta and autonomic nervous system. AIST Shikoku Center Research Seminar, Takamatsu, Japan, October 2025.
5) **Masaki Mizuno**. Central Insulin Resistance: Impact on Autonomic Cardiovascular Control During Exercise. 2nd Annual Hardin Translational Cardiovascular Research Symposium, UT Arlington, Arlington, TX, June, 2025.
6) **Masaki Mizuno**. Be Ambitious With Your Career Goals. Special lecture, Graduate School of Life and Health Sciences, Chubu University, Kasugai, Japan, November 2024.
7) **Masaki Mizuno**. Be Ambitious With Your Career Goals. Special lecture, Graduate School of Physical Education, National Institute of Fitness and Sports in Kanoya, Kagoshima, Japan, November 2024.
8) **Masaki Mizuno**. Research Mindset, SHEEP seminar, School of Physical Education, National Institute of Fitness and Sports in Kanoya, Kagoshima, Japan, November 2024.
9) **Masaki Mizuno**. Open up career paths for young scientists and graduate students through a variety of experiences. Symposium (organizer), 32nd Congress of Japan Society of Exercise and Sports Physiology, Kanazawa, Japan, August 2024.
10) **Masaki Mizuno**. Frontiers of autonomic cardiovascular control during exercise. Symposium (organizer and speaker), 32nd Congress of Japan Society of Exercise and Sports Physiology, Kanazawa, Japan, August 2024.

11) **Masaki Mizuno**. An integrative approach to better understand the mechanisms of the exercise pressor reflex in health and disease. Symposium (speaker), 13th Congress of The International Society for Autonomic Neuroscience, Birmingham, UK, July 2024.
12) **Masaki Mizuno**. Exercise pressor reflex in vivo humans and animals studies. Symposium, Annual Meeting of Japanese Society of Physical Fitness and Sports Medicine, Tokyo, September 2023.
13) **Masaki Mizuno**. Amyloid beta and blood pressure regulation. Seminar, Research Institute for Life and Health Sciences at Chubu University, Kasugai, Japan, September 2023.
14) **Masaki Mizuno**. Impact of cardiovascular disease on sensory afferent function during physical exercise. Symposium, 100th Anniversary Meeting of Physiological Society of Japan, Kyoto, Japan March 2023. *Journal of Physiological Science 73 (Suppl. 1):70, 2023*
15) **Masaki Mizuno.** Insulin resistance and muscle sensory neuropathy. Seminar, Research Institute for Life and Health Sciences at Chubu University, Virtual, September 2021.
16) **Masaki Mizuno**. Insulin resistance and autonomic dysfunction in diabetes. Seminar in Faculty of Pharmaceutical Sciences, Teikyo Heisei University, Tokyo, Japan, September 2019.
17) **Masaki Mizuno**. Panel Discussion -Research abroad-. 74th Japanese Society of Physical Fitness and Sports Medicine, Tsukuba International Conference Center, Ibaraki, Japan, September 2019.
18) **Masaki Mizuno**. Cardiovascular regulation in diabetes -role of insulin-. 33rd Annual Respiratory Meeting, Tsukuba International Conference Center, Ibaraki, Japan, September 2019.
19) **Masaki Mizuno**. Blood pressure control and lifestyle disease -exercise pressor reflex-. University of Tsukuba/The National Institute of Advanced Industrial Science and Technology Joint Seminar, University of Tsukuba, Ibaraki, Japan, September 2019**.**
20) **Masaki Mizuno**. Research abroad and research career path in US. Graduate School Research Seminar, The University of Tokyo, Tokyo, Japan, April 2019.
21) **Masaki Mizuno**. Targeting insulin resistance to ameliorate abnormal cardiovascular control in diabetes. Research Seminar, Kobe University, Kobe, Japan, March 2019.
22) **Masaki Mizuno**. Targeting insulin resistance to improve abnormal cardiovascular control in diabetes. Faculty Development Seminar, Hiroshima University, Hiroshima, Japan, March 2019.
23) **Masaki Mizuno**. Targeting insulin resistance to improve exaggerated circulatory control in diabetes. Graduate School Seminar, Nagoya University, Nagoya, Japan, March 2019.
24) **Masaki Mizuno** and Hoda Yeganehjoo. Targeting insulin resistance to improve abnormal cardiovascular control in diabetes. Capra Interdisciplinary Healthcare Symposium "Collaborate: Using Team Approaches to Advance Research on Chronic Conditions", Dallas, USA, February 2019.
25) **Masaki Mizuno**. Dysfunctional neural control of circulation during physical activity in hypertension. Graduate School Seminar, Juntendo University, Inzai, Japan, July 2014.

26) **Masaki Mizuno**. Abnormal neural regulation of circulation during physical activity in hypertension. Graduate School Seminar, Toyo University, Tsurugashima, Japan, July 2014.
27) **Masaki Mizuno**. Neural control of circulation during physical exercise and its dysfunction in hypertension. Graduate School Seminar, The University of Tokyo, Tokyo, Japan, July 2014.
28) **Masaki Mizuno**. Dysfunctional autonomic regulation of circulatory system during exercise in hypertension. 137th Sports Sciences Meeting, Waseda University, Tokorozawa, Japan, July 2014.
29) **Masaki Mizuno**. The mechanisms for abnormal neural control of circulation during exercise in hypertension. Research Seminar, Japan Women's College of Physical Education, Tokyo, Japan, July 2014.
30) **Masaki Mizuno**. Abnormal neural control of circulation during exercise in hypertension. Research Seminar, Hiroshima University, Hiroshima, Japan, July 2014.
31) **Masaki Mizuno**. Neural control of circulation during exercise in hypertension. Graduate School Seminar, Nagoya University, Nagoya, Japan, June,2014.
32) **Masaki Mizuno**. Autonomic heart rate control using systems analysis. 48th Sports Sciences Meeting, Waseda University, Tokorozawa, Japan, July 2007.
33) **Masaki Mizuno**. Evaluation of changes in peripheral circulation during exercise using PET and NIRS. Symposium: Bioimaging in physical fitness and sports medicine, 61th Japanese Society of Physical Fitness and Sports Medicine, Kobe, Japan, September 2006.
34) **Masaki Mizuno** and Isao Muraoka. Evaluation of heterogeneities in skeletal muscle perfusion and metabolism and their physiological roles during exercise. International Sports Science Network Forum in Nagano, Matsumoto, Japan, November 2004.

VIII. TEACHING ACTIVITIES

---

1. Course participation:
a. Within department
1) ACR 5091, Independent Research -Course director (Fall, 2022-present), Department of Applied Clinical Research, University of Texas Southwestern Medical Center
2) ACR 5108, Doctoral Seminar II (Fall, 2020-present), Department of Applied Clinical Research, University of Texas Southwestern Medical Center
3) ACR 5107, Doctoral Seminar I (Fall, 2020-present), Department of Applied Clinical Research, University of Texas Southwestern Medical Center
b. Intradepartmental/School/University
1) HCS 5407, SSHP Human Physiology Block III (Gastrointestinal Physiology) (Summer 2015-present), School of Health Professions, University of Texas Southwestern Medical Center

c. Other teaching, activities

<u>Weinberger Laboratory Cardiovascular Physiology Journal Club</u>

1) Director, 2016-2019

2) Member, 2009-2022

Supervision and direction of postdoctoral fellow
1) Ayumi Fukazawa (Ph.D, UT Southwestern Medical Center, 2022-present)
2) Amane Hori (Ph.D, UT Southwestern Medical Center, 2023-2026)
3) Juan A. Estrada (Ph.D, UT Southwestern Medical Center, 2020-2022)
4) Rie Ishizawa (Ph.D, UT Southwestern Medical Center, 2018-2021)
5) Han-Kyul Kim (Ph.D, UT Southwestern Medical Center, 2017-2021)

Supervision and direction of visiting researcher
1) Norio Hotta (Ph.D, Chubu University, 2019)
2) Zeljka Minic (Ph.D, University of Detroit Mercy, 2016)
3) Nan Liang (Ph.D, University of Hiroshima, 2011-2012)
4) Qinglu Li (Ph.D, University of Minnesota, 2010)

Applied Clinical Research Ph.D. Dissertation Committee
1) Caitlin Jarrard (Ph.D Student, UT Southwestern Medical Center, Spring 2024, Member)
2) Sepeadeh Radpour (Ph.D Student, UT Southwestern Medical Center, Summer 2023-2024, Chair)
3) Victoria Gonzalez (Ph.D Student, UT Southwestern Medical Center, Summer 2023-2025, Chair)
4) Patricia Champagne (Ph.D Student, UT Southwestern Medical Center, Summer 2022-2023, Member)

Applied Clinical Research Ph.D. Qualifying Exam Committee
1) Oluwabukunmi Omiwole (Ph.D Student, UT Southwestern Medical Center, Summer 2026, Chair)
2) Michael Mitakidis (Ph.D Student, UT Southwestern Medical Center, Summer 2025, Chair)
3) Yosanly Cornelio (Ph.D Student, UT Southwestern Medical Center, Summer 2024, Chair)
4) Andrew Nasr (Ph.D Student, UT Southwestern Medical Center, Summer 2023, Chair)
5) Sepeadeh Radpour (Ph.D Student, UT Southwestern Medical Center, Summer 2023, Member)
6) John Giacona (Ph.D Student, UT Southwestern Medical Center, Summer 2022, Chair)
7) Victor Blais (Ph.D Student, UT Southwestern Medical Center, Summer 2020, Member)

Applied Clinical Research Ph.D. Program student mentoring/advising
1) Kyla Covert (Ph.D Student, UT Southwestern Medical Center, 2026-present)
2) Michell King (Ph.D Student, UT Southwestern Medical Center, 2024-present)
3) Victoria Gonzalez (Ph.D Student, UT Southwestern Medical Center, 2022-2025)
4) Patricia Champagne (Ph.D Student, UT Southwestern Medical Center, 2021-2024)
5) Victor Blais (Ph.D Student, UT Southwestern Medical Center, 2019-2024)
6) Novelle Kew (Ph.D Student, UT Southwestern Medical Center, 2019)

Ph.D Student mentoring/advising
1) Amane Hori, (Ph.D Student, Chubu University, 2022-2023)
2) Ayumi Fukazawa (Ph.D Student, University of Tokyo, 2020-2022)
3) Aswini Kanneganti (Ph.D Student, UT Dallas, 2015)

Southwestern School of Health Professions Student mentoring/advising
1) Yoko Fujikawa (Clinical Nutrition Student, UT Southwestern Medical Center, 2019-2020)

Summer Intern Undergraduate Student mentoring/advising
1) Rikita Koshimizu (Summer Intern, UT Southwestern Medical Center, 2026)
2) Blaine Williamson (Summer Intern, UT Southwestern Medical Center, 2019)
3) Sarah Massey (Summer Intern, UT Southwestern Medical Center, 2019)
4) Scott Crawford (Summer Intern, UT Southwestern Medical Center, 2015)
5) Samuel Rosengarden (Summer Intern, UT Southwestern Medical Center, 2015)
6) Brandon Cherry (Summer Intern, UT Southwestern Medical Center, 2009)

IX. PROFESSIONAL SERVICE

---

1. Clinical Activities
   N/A
2. Service to professional societies
   N/A
3. Editorial services

1) Associate Editor, Frontiers in Physiology (2022-present)
2) Associate Editor, BMC Cardiovascular Disorders (2016-present)
3) Review Editor, Frontiers in Physiology (2011-2022)
4) Guest reviewers:
   Acta Physiologica, Advances in Medical Sciences, Advanced Science, Aging, American Journal of Hypertension, American Journal of Physiology Heart and Circulatory Physiology, American Journal of Physiology Renal Physiology, American Journal of Physiology Regulatory, Integrative and Comparative Physiology, Annals of Clinical and Experimental Hypertension, Annals of Translational Medicine, Brain Stimulation, Applied Physiology, Nutrition, and Metabolism, Archives of Biochemistry and Biophysics, Autonomic Neurosciences: Basic and Clinical, Behavioural Brain Research, Brain Stimulation, Canadian Journal of Physiology and Pharmacology, Hypertension, Cardiovascular Research, Circulation, Computational and Structural Biotechnology Journal, Diabetes, Obesity and Metabolism, Circulation Research, European Journal of Pharmacology, Experimental Physiology, Exercise and Sport Sciences Reviews, Frontiers in Physiology, Frontiers in Cardiovascular Medicine, Hypertension, Hypertension Research, IEEE Transactions on Biomedical Engineering, International Journal of Hypertension, International Journal of Sport and Health Science, JCI Insight, Journal of American College of Cardiology, Journal of Applied Physiology, Journal of Clinical & Experimental Cardiology, Journal of Molecular and Cellular Cardiology, Journal of Modern Physiological Research, Journal of Neurophysiology, Journal of Physiology, Journal of Physiological Sciences, Journal of Thermal Biology, Life Sciences, Medicine & Science in Sports & Exercise, Neuroscience Letters, Neuroscience, Physiological Reports, Physiology International, PLOS ONE, Scandinavian Journal of Medicine and Science in Sports, Scientific Reports
   (185 service from 52 journals)

4. Invited and special lectures of clinical and service relevance

Planning, Coordinating and Organizing Seminar

1) Marc Kaufman, PhD, Professor, College of Medicine, Pennsylvania State University (2019)
2) Kanji Matsukawa, PhD, Professor, Hiroshima University (2019)
3) Norio Hotta, PhD, Associate Professor, Chubu University (2018)

5. Consultantships

N/A

6. Professional service to the community

Service to School of Health Professions
1) Faculty Promotion & Tenure Committee
   -Member(2022-present)
2) Faculty Post-Tenure Review Committee
   -Member(2022-present)
3) Research Advisory Committee
   -Member (2016-present)
   -Grant review sub-committee
   -Member (2019-present)
4) Faculty Assembly Executive Council
   -Member at large (2016-2019)

Service to Department of Applied Clinical Research
1) Summer Research Internship Program Committee
   -Member (2024-present)
2) Public Relation Committee
   -Member (2023-present)
3) Graduate Studies Committee
   -Member (2019-present)
4) Admissions Committee
   -Member (2019-present)
5) Curriculum Committee
   -Member (2019-present)

7. Other
   N/A

X. ADMINISTRATION [College and University Service]

XI. MEMBERSHIPS, HONORS, AWARDS and SPECIAL RECOGNITION

1. Scholarly, Professional and Scientific Memberships

1) American Heart Association (2015~)
2) American College of Sports Medicine (2009~), Fellow (2023~)
3) American Physiological Society (2007~)

2. Awards, Honors, Special Recognition

1) Gilberto Moralez Jr Outstanding Mentor Award, University of Texas Southwestern School of Health Professions (2024)
2) Established Investigator Award, University of Texas Southwestern School of Health Professions (2022)
3) 2021 Star Reviewers, AJP-Regulatory, Integrative and Comparative Physiology, American Physiological Society (2022)
4) Outstanding Junior Faculty Award, University of Texas Southwestern School of Health Professions (2019)
5) New Investigator Award, University of Texas Southwestern School of Health Professions (2016)
6) Excellent Young Researchers Overseas Visit Program, Japan Society for the Promotion of Science (2010)
7) Research Fellowships for Young Scientists, Japan Society for the Promotion of Science (2009)
8) Fellowships for Research Abroad, The Nakatomi Foundation (2009)
9) Fellowship for Research Abroad, The Naito Foundation (2009)
10) Incentive Award, 8th Neurocardiology Workshop (2007)
11) Young Investigator Award (1st Prize), 59th Japan Society of Physical Fitness and Sports Medicine (2004)

XII. PROFESSIONAL GROWTH AND DEVELOPMENT

1) Participant in cardiovascular journal club hosted by Weinberger Laboratory
2) Attended Cardiology Grand Rounds Lectures
3) Attended SSHP Lecture Series and Capra Research Symposium
4) Attended Clinical Translational Research Forum hosted by University of Texas at Arlington
5) Established research collaborations with faculty in:

Extramural

- Biomechanics and Exercise Physiology Research Group, The National Institute of Advanced Industrial Science and Technology (AIST), Amane Hori, Ph.D.
- Biomechanics and Exercise Physiology Research Group, The National Institute of Advanced Industrial Science and Technology (AIST), Ryota Asahara, P.T., Ph.D.

- Department of Sports and Life Science, National Institute of Fitness and Sports in Kanoya, Rie Ishizawa, Ph.D.
- Department of Kinesiology and Health Education, UT at Austin, Audrey Stone, Ph.D.
- Faculty of Pharmaceutical Sciences, Teikyo Heisei University- Kenta Yamamoto, Ph.D.
- Department of Exercise Science and Physiology, Prefectural University of Hiroshima- Hideaki Kashima, Ph.D.
- Department of Kinesiology, Kansas State University- Steven Copp, Ph.D.
- Department of Cellular and Integrative Physiology, University of Nebraska Medical Center- Hanjun Wang, M.D.
- College of Life and Health Sciences, Chubu University- Norio Hotta, Ph.D.

Intramural

- Department of Internal Medicine, Cardiology- Qi Fu, M.D., Ph.D
- Department of Applied Clinical Research- Scott Smith, Ph.D.
