Appointments

Associate Professor (with tenure)
Depts. of Internal Medicine and Neuroscience
Investigator, Peter O'Donnell Jr. Brain Institute
Neuroscience Graduate Program
Molecular Metabolism & Metabolic Diseases Track
University of Texas Southwestern Medical Center, 2015.9-present

Education

Case Western Reserve University, Cleveland, OH, 2004-2010.
Ph.D., Dept. of Neurosciences, School of Medicine.
Pet-1 Is Required Across Different Stages of Life to Regulate Serotonergic Function.
Mentor: Evan S. Deneris, Ph.D.

Mentoring Statement

I have been mentoring high school, undergraduate/graduate students, and postdoctoral fellows over the last 15 years. Each year, our lab welcomes new summer students from the UTSW STARS and SURF research programs. Currently, we are accepting rotation students who are interested in basic and translational research in neuroscience, metabolism, and developmental biology.

I benefited tremendously from two supportive and "hands-off" mentors. I rely on the same philosophy to train my students and postdocs, providing them with resources to explore and discover while offering assistance whenever necessary. That said, I would like to share my thoughts/expectations for prospective students/postdocs who are interested in joining our group.

First, the foremost skill I expect a graduate student to acquire during Ph.D. training is the ability of critical thinking. In my opinion, it outweighs other lab skills and will have an enduring impact on life beyond graduate studies. Second, I encourage my students to take on the challenge to learn new techniques and make original discoveries. Scientific research is by no means easy and often requires hard work, perseverance, and sometimes luck. Consider it as a practice for bigger challenges later in life. Only this time, you have the support of the whole lab. Finally, students need to graduate on time (within 5 years)! Graduate training is only the first step for a long career. Don't get trapped there for too long.

For postdoctoral trainees, I expect you already have the knowledge and skills to design and carry out individual experiments. It is time to polish other skill sets to become an independent researcher. I ask my trainees to write their own grants starting from the beginning. Moreover, I encourage them to seek every opportunity to present their research (WIPS, seminars, and journal clubs). What's more, trainees in my lab travel to attend national/international meetings each year to build their professional networks. In my view, postdoc training is a journey to find a unique niche for future independent research. I will work with you to collect the necessary credentials (papers) and resources (funding) to achieve this goal.

Research Support

Ongoing:

NIH R01 DK114036 (PI, Liu)

7/2017-2/2028

Hypothalamic MC4Rs and Antipsychotic Drug-induced Metabolic Syndrome

NIH R01 DK130892 (PI, Liu)

1/2022-12/2025

A Human Genetic Variant Ties Defective Hypothalamic Development to Obesity and Diabetes

NIH R01 DK136592 (PI, Liu, pending)

4/2024-3/2029

Deconstruct Raphe Serotonin Neurons that Regulate Satiety

AHA 23POST1019715 (Postdoctoral mentor)

1/2023-12/2024

American Heart Association Postdoctoral fellowship for Li Li Ph.D.

UTSW Medical Foundation Research Start-up (PI, Liu)

9/1/2015-present

Completed:

2020	Scientist Development Award (AHA 16SDG2726001)
2019	Pilot & Feasibility Award (NIH U01NS090405)
2018	Pilot & Feasibility Award (UTSW)
2018	Grossman Endowment Award for Diabetes Research
2016	Beginning Grant-in-Aid Award (AHA 16BGIA27260023)
2014	Fellowship, Davis Foundation in Eating Disorder Research.
2014	Fellowship, American Diabetes Association.
2011	Ruth L. Kirschstein National Research Service Award (T32).

Awards and Honors

6/2022 Junior Investigator Award, Chinese American Diabetes Association

6/2018 Grossman Award for Excellence in Diabetes Research

1/2014 Scholarship, Keystone Symposium 2014, Vancouver, Canada.

1/2014 Scholarship, Molecular Neuroanatomy Course, Allen Brain Institute.

10/2011 Fellowship, Davis Foundation in Eating Disorder Research

1/2011 Ruth L. Kirschstein National Research Service Award (NRSA)

4/2011 Doctoral Excellence Award, Case Western Reserve University

5/2010 Vance Lemmon Award, Case Western Reserve University

5/2008 The President's Award, Case Western Reserve University

5/2008 Excellence in Science Program, American Association for the Advancement of Science (AAAS)

Invited Talks

02-05-2024 Keystone Symposium: Vancouver, BC, Canada

04-26-2023 International Society for Serotonin Research, Cancun, Mexico
